

IHO Crowdsourced Bathymetry Working Group Update

Serge Gosselin, David Wyatt, & Jennifer Jencks

December 5, 2017

CSBWG5

Quick reminder: why are we here?

From the IRCC:

Prepare an IHO publication on policy for trusted crowdsourced bathymetry to provide guidelines on the collection and assessment of CSB data.

Timeline

13-14 Feb	Generate mature draft
1 Mar	Circulate initial draft to MS and stakeholders for comment
14-30 Apr	Prepare draft GD for submission to IRCC9
1 Jul	IRCC formally circulate draft for MS comment
Dec '17	CSBWG5 meeting, consider external input and comments
Apr/May '18	Prepare Edition 1.0.0 for submission to IRCC10
Mid - '18	CSBWG6 meeting, commence work on Edition 2.0.0
Sep '18	Formal submission to IHO Council2
Oct '18	IHO Council2 approval
1 Jan 2019	CSBGD Edition 1.0.0 released

The Plan

1. Before meeting, review B-12, including all comments received.
2. Breakout groups to discuss comment suitability for inclusion and edit B-12 accordingly.
3. If decided comments will not to be considered or fully integrated/considered, editor or Chair to provide a justification to the author.

Additional discussions, if time allows...

1. Alternative B-12 formats and access aiming to ease the document's use and relevance among the maritime community.
 - a. Simple-to-navigate web document
 - b. One to two page executive summary document that could direct the reader to the appropriate section of B-12 for the necessary details.
2. Environmental impact guidance for (possible) inclusion in Edition 2.0
 - a. Initial considerations and review of other organizational guidance.
3. Participation incentives
4. Outreach efforts
5. Downstream guidelines for (possible) inclusion in Edition 2.0
 - a. Should we address “What does the end-user need to make use of the data”

Questions??
