DQWG Letter : 01/2017 Rev1

Date 20 July 2017

Dear Colleagues

Subject: DQWG Action DQWG13-08.1A Data Quality Indicators for bathymetric data on ECDIS chart display

Thank you for those attending the 12th DQWG meeting in June 2017. During this meeting a paper from NCWG was received and discussed: "Proposal of a new portrayal solution for data quality indicators (M_QUAL/CATZOC) in ECDIS."

During this meeting the idea was proposed to display quality of bathymetric data in the same manner as now done with safety contours and shallow areas. NL has written a paper for discussion by correspondence by the DQWG members. This process should be finalized before Sep 15th 2017.

Depending on the outcome of this discussion, a paper will be drawn and forwarded to other relevant HSSC-WG's. If the recommendation is approved by the DQWG members, it will be reported at HSSC-9 on the 08th of November 2017 in Ottawa.

I would like to receive your input no later than **30 Aug 2017**. If no input is received, we assume you agree with the proposed papers and actions.

Thank you
Rogier Broekman
Chair DQWG
