Dear Sir:

The Canadian Advisory Committee on Undersea Feature Names is pleased to propose 12 existing Canadian undersea feature names to be fast-tracked into the GEBCO Gazetteer database. These already-charted feature names were approved by the Geographical Names Board of Canada and are in the Canadian Gazetteer. All these features are located inside the Contiguous zone and the Canadian Exclusive Economic Zone, have been in long term use, and have appeared on published charts as far back as 1878.

The two features "Hamilton Bank" and "Saglek Bank" within the 12 existing Canadian undersea feature names are already listed in GEBCO gazetteer. These banks are identified at the on-line GEBCO gazetteer by points. In order to update these records, polygons are provided.

Attached, hereto, is a list of the names with their spatial component and all references and descriptions. The Shape file contains all the polygons of the 12 features.

Please do not hesitate to contact us if you have any concerns or questions relating to this dataset.

Yours sincerely,

Connie Wyatt Anderson  
Chairperson, Geographical Names Board of Canada
