7.10. General information Effective from November until April

Applies in: South Carolina, Georgia and Florida calving area ([Link](#)),

North Atlantic Right Whale: Calving right whales have been sighted as far north as Cape Fear, NC and as far south as Miami, FL with rare sightings in the Gulf of Mexico

All related paragraphs:

[Area](#)

7.11. General information Effective from 01 January until 31 July

Applies in: NE NARW Sighting area ([Link](#)),

Content type: Abstract or summary

As weather and conditions permit, dedicated seasonal programs of aerial and vessel surveys are conducted to provide whale sighting information to mariners. Survey planes occasionally use VHF-FM channel 16 to contact ships directly if whales have been spotted in close proximity to that vessel. However, many right whales go undetected by surveys. Seasonal right whale advisories and sighting reports are broadcast periodically for these and surrounding areas by Coast Guard Broadcast Notice to Mariners, NAVTEX, NOAA Weather Radio, Cape Cod Canal Vessel Traffic Control, the Bay of Fundy Vessel Traffic Control, and are included in the return message from the Right Whale Mandatory Ship Reporting (MSR) systems. General sighting information may be obtained by sending an e-mail to the responsible authority.
