

Production of the new ENC's "Harbour Antwerpen Noord", "River Schelde to Wintam" and "Canal Gent-Terneuzen".

In September 2004 the two Belgian Hydrographic Offices, namely in Ostend and Antwerp, were reorganised into one Flemish Hydrography. This reorganisation made it possible to pass on the knowledge of ENC-production from Ostend to Antwerp. The CARIS software was put into use in the office in Antwerp and resulted into the production of two new ENC's. Since February 2006, the new ENC's "Harbour Antwerpen Noord" and "River Schelde to Wintam" are being distributed by IC-ENC.

The production of the last Belgian ENC – Canal Gent-Terneuzen – is almost finished and this ENC will be send to IC-ENC for validation at the end of 2006. This ENC will complete the list of Belgian ENC's:

BE3VLBNK	Flemish Banks
BE5ZEEBR	Zeebrugge Harbour
BE5OOSTE	Oostende Harbour
BE5ANTWN	Antwerpen Noord
BE5ANTWZ	River Schelde to Wintam
BE5KGETE	Canal Gent - Terneuzen (in production)

ENC Antwerpen Noord

ENC River Schelde to Wintam
