30% Magenta (VTS, TSS etc).	18	27	0	2
10% Black (Urban tint).	0	6	52	10

Note: HOs who wish to test these colour values need to take into account the profile of the Substrate (base medium), the hardware (ink plotters) and the software (RIP) installed on equipment. Values may need small adjustments until the required colour is achieved.

These values are subject to slight changes in the future should calibration be carried out on the plotters.
