Introduction

The procedures for amending S-52 and its Appendices follow those established for S-57, except in stressing the distinction between immediate and deferred amendments. Definitions and procedures for these amendments are given in S-52 App.2 "Colour & Symbol Specifications for ECDIS" (CSMWG Specs), section 1.2.4.1.

Amendments to S-52 affect primarily the ECDIS manufacturers, though the mariners will benefit from the improvements made. The consequences of revisions of detail in an immediate amendment are generally a relatively minor matter, for example replacing a table in the manufacturer's software.

An immediate amendment to the CSMWG Specs or Presentation Library (PresLib) changes the Edition number. It applies only to corrections, which must not depend on any deferred amendment.

A deferred amendment is not entered in any S-52 Appendix 2 document until the next Edition which is identified as bringing the deferred amendments into force.

The item number of each amendment item gives the Edition number of the S-52 Main Document, the CSMWG Specs or the PresLib to which the amendment item applies. This Edition number will change once an immediate amendment is applied, but does not change for a deferred amendment.

At the end of each immediate amendment, there is a reminder of the current Edition number after the amendment is applied.

NOTES

1. These amendments are intended to remind users of S52 of the all changes made at meetings of the 16th International Hydrographic Conference, CSMWG15 and CSMWG 16 and to point how these changes affect S-52 Main Document, CSMWG Specs Edition 4.2 and PresLib Edition 3.3 in detail.

2. CHANGE HISTORY FOR S-52 APP.2 FROM CSMWG SPECS 4.0 --> 4.2 AND PRESLIB 3.0-->3.3

Edition 4.2 of the CSMWG Specs and Edition 3.3 of the PresLib, issued in March 2004, brought all outstanding deferred amendments to Editions 4.1 of the CSMWG Specs (issued January 1999) and 3.2 of the PresLib (issued My 2000) into effect.
