DIPWG1-14.1C

Report on the Project Team Meeting for ISO 19117 in Rome, NY, USA

The ISO 19117 project team met from 14-18 July at the Northrop Grumman Defense Mission Systems Division in Rome, NY, USA.

The main topic was to continue the work on a new working draft of ISO 19117 (Geographic Information Portrayal).

For the IHO Mr. Barrie Greenslade, UKHO (Chairman of TSMAD), and Mr. Holger Bothien, SevenCs GmbH took part in the meeting.

The other participants were:

- Mr. Daniel Gleason, NGA, USA (chair)
- Mr. Ian Greasley, Northrop Grumman, USA (editor)
- Mrs. Marie-Lise Vautier, IGN, France

The main topics on the agenda were the UML models both of the portrayal process and the symbol model. All models were finished during the meeting. The view of the IHO was taken into consideration and has influenced especially the model for the portrayal process. It turns further out that the new models are quite less complex than they were before. Although the models (diagrams) are finished there is still no textual description for this model. In addition an XML encoding for the portrayal rules and all symbol specifications has to be developed. Most of that work is planned to do in another project team meeting (October or November 2008). Both the date and the venue of the meeting are not fixed. Holger Bothien has offered to host the meeting in Hamburg, Germany.

Summary:

The UML diagrams are finished, the text and the XML encoding must still be done. It seems to be useful that at least the text part of the standard should be also influenced by an IHO representative in the project group.

Sgd. Holger Bothien.
