Which of the existing Data Quality Indicators are populated in your ENC's?

Please complete the following table. If you do not use or populate a particular S-57 Object or Attribute please indicate the reason in the comment column. Any other comments (for example, the meaning of attribute is unclear or ambiguous) will be helpful.

Object / Attribute	Used or Populated (Yes / No)	Comment
M_ACCY	No	We consider to use this feature class in the future
HORACC	No	
POSACC	No	It should be possible to set position accuracy on feature classes (has been requested by ECDIS users). E.g. Beacons, shoreline constructions and wrecks
SOUACC	No	We consider to use this attribute in the future
VERACC	No	We consider to use this attribute in the future
M_QUAL	Yes	
CATZOC	Yes	We find CATZOC complicated to interpret for the ECDIS user and have therefore encoded ZOC B for all data. See also additional comments.
M_SREL	No	
SURATH	No	
SURSTA	No	
SUREND	No	
TECSOU	Yes	

Additional comments (if required)

We see a need for a more general and overall quality indicator with the scope to describe the total situation concerning all information important for navigation in a given area. This emphasis should be to provide quality information that is reasonably easy to understand and use for the mariner.

Sweden will present a proposal at 2nd HSSC meeting 26-29 October 2010 regarding quality indicators. Ref. to action HSSC 1/26.
