

Hydrographic Services and Standards Committee

Ref: HSSC4-03D

Comments on the Report to

HSSC-4

by the Correspondence Group on

Definition and Length of Coastline

Comments:

- Proposed method only relevant for comparison – not a definitive figure
- Not clear what it may be used for. Not relevant or suitable for all purposes
- May be an existing official national position which is different
- Calculation in Annex for UK is only a test of the system, not an official result

Action required of HSSC

- Note the comments in this submission
- Consider appropriate action
