New
S-52 Presentation Library, Edition 4.0
&
S-52, Edition 6.1

HSSC-5 Shanghai
5-8 November 2013

Background

- ✦ Nov 2011 – HSSC-3 (Monaco)
 - UKHO paper HSSC3-05.3B “Proposed Revision of S-52 Presentation Library”
- ✦ Revision was to address known “ECDIS anomalies” and implementation irregularities, and to improve the overall clarity of the document
- ✦ HSSC directed DIPWG to develop new edition (3.5) S-52 Presentation Library

Schedule reported at HSSC-4

- ✦ Sep 2012 - DIPWG chair reported the intent to have a draft PresLib Edition 3.5:
 - Ready for discussion at next TSMAD-25 (Jan 2013) and
 - Reviewed at joint TSMAD-26/DIPWG-5 (Jun 2013) and
 - Endorsed at HSSC-5 (Nov 2013)
- ✦ Technically, this schedule has been met, but ...
- ✦ ... presentation will provide details affecting
 - the development schedule
 - scope of changes that new PresLib will implement

Expanded Scope of Revision

- ✦ Extensive revision of PresLib presented at TSMAD-25 (Jan 2013)
- ✦ Concern expressed that extent of changes exceeded the original intent to only correct inconsistencies and clarify ambiguities
- ✦ Concern that DIPWG resources, primarily OEMs, would be stretched to an appropriate level of support to develop the new PresLib, complete the S-100 model and other TSMAD activities

Finalization of PresLib4.0

- ✦ 2 iterations of review by correspondence prior to DIPWG-5 (June 2013) but more time was needed
- ✦ DIPWG established “PresLib 4.0 finalization Sub-WG” to:
 - Review and finalize the draft edition without making any further content changes
 - Report to DIPWG on the disposition of the comments received from the review of the original draft PresLib
 - Complete work in time for approval at HSSC-5

PresLib 4.0 Finalization Sub-WG Meetings

Duration	Date	Location	Participants
3 days	Jun 2013	Washington	12
5 days	Jul 2013	Hamburg	9
4 days	Aug 2013	Taunton	7

Broadening Extent of Changes

- ✦ Consensus grew within sub-working group to broaden scope of changes beyond DIPWG's direction to proceed, "without making any further content changes"
- ✦ Additional areas were identified where revision was desired
- ✦ Decision to make some optional functions mandatory

Nature of Changes to PresLib (1 of 4)

- ✦ Language was modernized and simplified
- ✦ Old diagrams and examples were updated
- ✦ Redundancies and repeated copies of several tables were eliminated
- ✦ Multiple options for performing the same task were limited
- ✦ Elements that have never been implemented, such as raster symbol definitions, were deleted

Nature of Changes to PresLib (2 of 4)

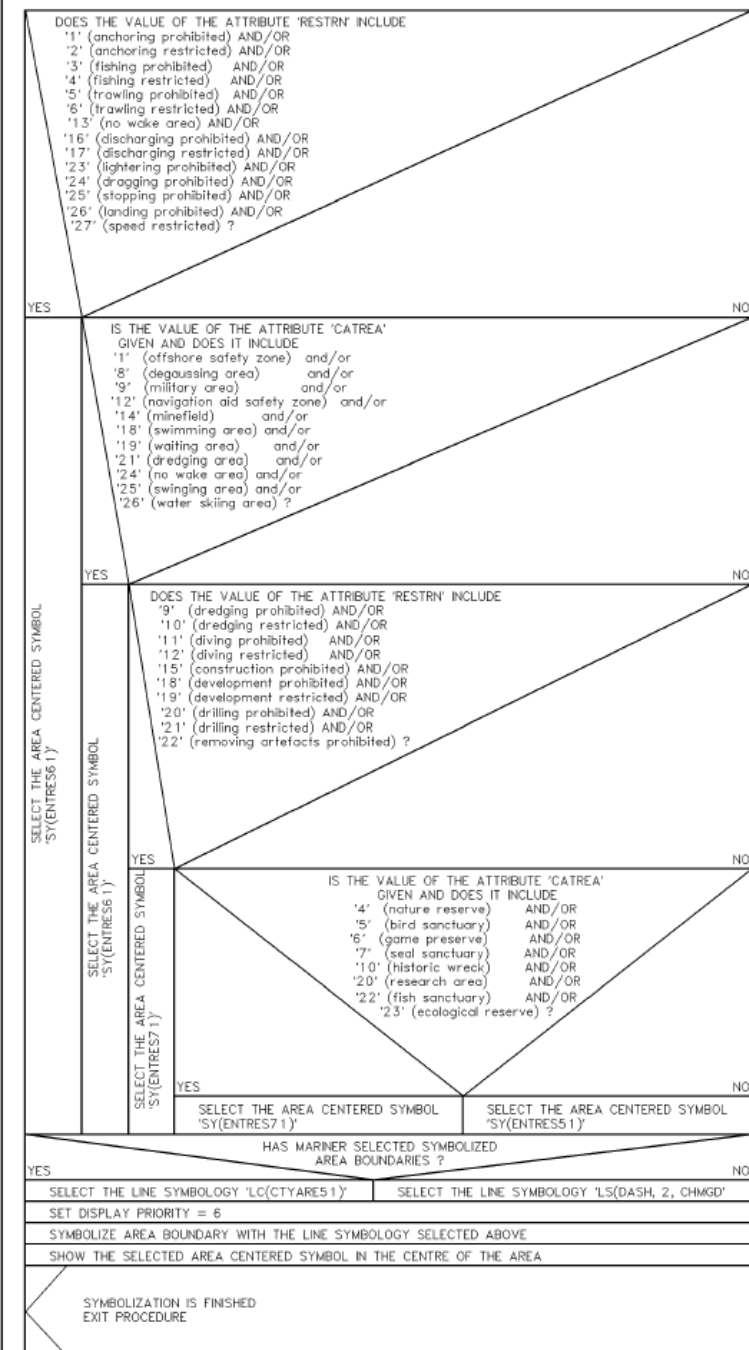

- ✦ Symbolization look-up and color tables were put into separate files
- ✦ Detailed examples were added to provide developers with clear guidance for implementing complex parts of ECDIS portrayal
- ✦ New symbols were added assist mariners in identifying date dependent features and automatic updates

Nature of Changes to PresLib (3 of 4)

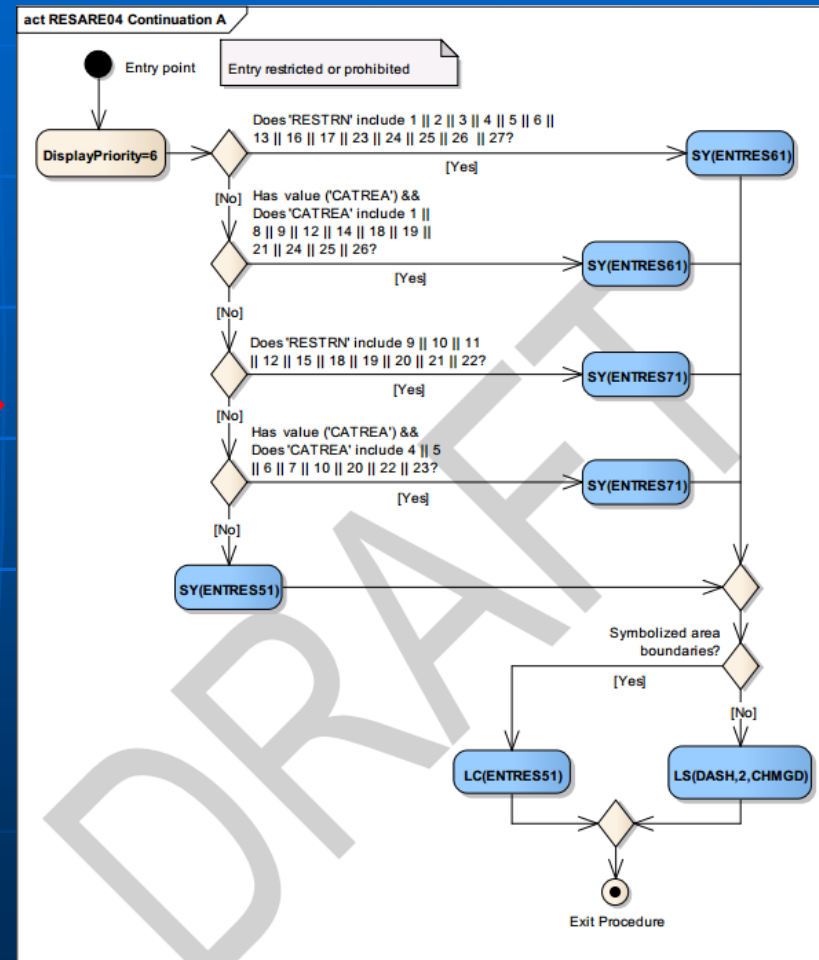

- ✦ Changes made to reflect the requirements in the revised IMO Performance Standard for ECDIS
 - Added new sections for detection and notification of navigational hazards, detection of areas for which special conditions exist and detection of the safety contour
 - Provide clear guidance on the S-57 objects and attributes that must initiate an alert and/or indication within ECDIS
 - Will reduce the number of extraneous alarms
 - Use of IMO defined viewing groups is now mandatory

Nature of Changes to PresLib (3 of 4)

- Replaced complex Nassi-Shneiderman diagrams used to describe the Conditional Symbolology Procedures (CSPs) with Unified Modeling Language (UML)

Changes to the Main S-52 Specification

- ✦ A need to revise the colour calibration section of the main S-52 document was identified
- ✦ S-52 Annexes B and C contained errors and obsolete references to CRT technology
- ✦ Annex B has been deleted, Annex C has been corrected
- ✦ Changes will result in new Edition 6.1 of S-52

Dependencies

- ✦ IEC is working on a new edition of IEC 61174, “ECDIS Operational and performance requirements, methods of testing and required test results”
- ✦ Revised IEC 61174 refers ECDIS chart related tests to S-64
- ✦ New S-64 will test new requirements in PresLib 4.0
- ✦ Many changes in the new PresLib will be carried forward into portrayal aspects of S-100 and S-101

... back to the Schedule

- ✦ Schedule for Preslib presented to HSSC4 was not fully realized
- ✦ Final drafts of S-52 6.1 and PresLib 4.0 were completed in Sept 2013, some digital files in Oct
- ✦ Nearly half of the companies that regularly attend DIPWG meetings participated in crafting the new editions, but ...
- ✦ ... full DIPWG membership has not reviewed the final result drafted by the OEMs and other experts

Action requested of HSSC

(similar to TSMAD request for S-64)

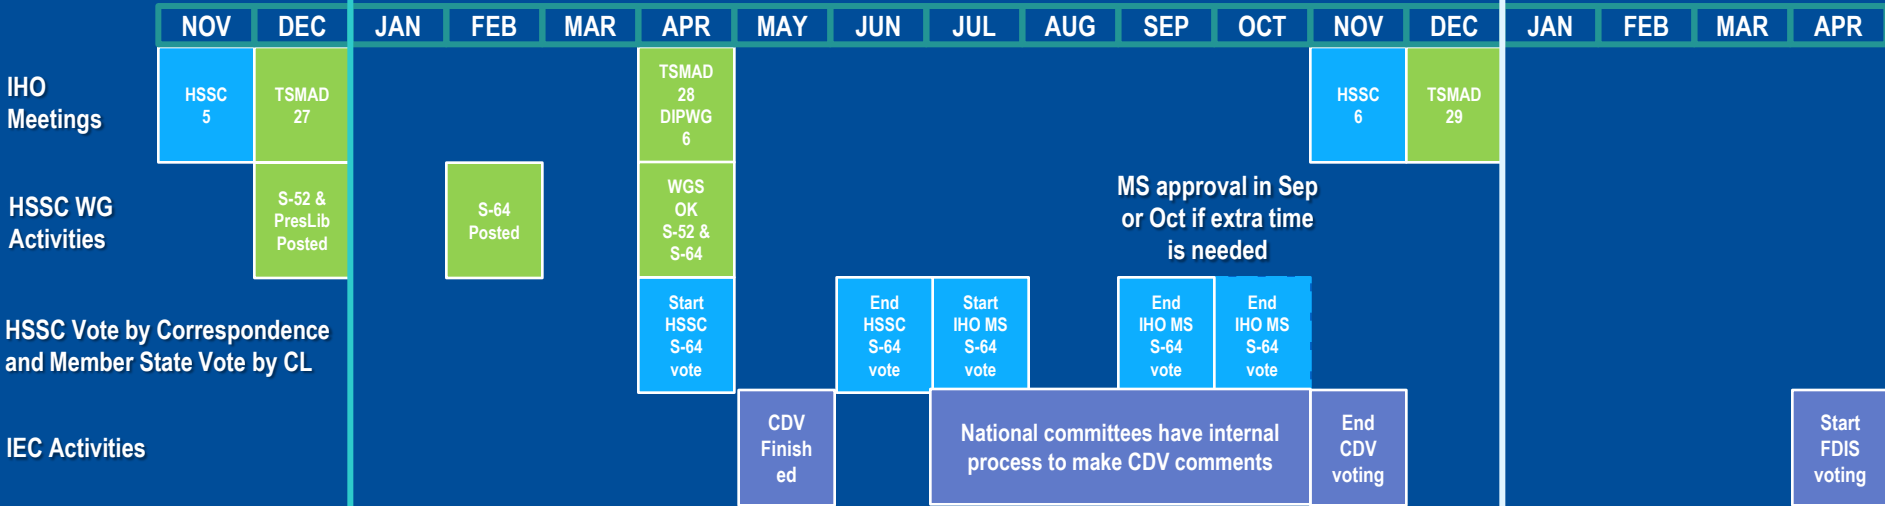

- ✦ Approve an initial familiarization version by HSSC to be posted on IHO website
- ✦ Allow further review of S-52, Ed 6.1 and PresLib Ed. 4.0 by DIPWG (starting in late-Nov) and
- ✦ Acceptance by WG at DIPWG-6 (April 2014)
- ✦ Endorsement of final version by HSSC-6 by correspondence
- ✦ Approval by MS by CL for publication in 2015, in line with the publication of new IEC 61174

2013

2014

2015

Rationale / Justification

- ✦ Proposed HSSC action will:
 - Enable a thorough review by DIPWG
 - Enable TSMAD to proceed with development of new edition of S-64
 - Enable HSSC to endorse fully vetted new editions of PresLib and S-64 at HSSC-6
 - Enable IHO MSs to approve new editions of PresLib and S-64 in time for concurrent release of:
 - S-52 PresLib, S-64 and EIC 61174
