

Hydrographic Services and Standards Committee

Proposal by the NHC

HSSC6-05.5B

Inventory of Chart Production Systems

Background

- ✦ The NHC58 recognised that many HOs are renewing their chart production systems and there are benefits to those HOs to get information on systems in use and experiences and best practices on their uses
- ✦ NHC58 agreed an action share this kind of information between NHC Members
- ✦ NHC will make a query within NHC Members

Proposal

- ✦ It is proposed that information on systems in use could be collected and distributed to all interested HOs [e.g. by CSPCWG]
- ✦ The intention is to make a one-time query, not to establish a continuously updated database
- ✦ This could be done by correspondence

Action requested of HSSC

- ✦ to Note this information
- ✦ to consider including an action or a work item on making a query on chart production systems in use
- ✦ to take any other actions as seen appropriate
