Report of the IEHG

Inland ENC Harmonisation Group

IEHG Observer: René Visser

(Rijkswaterstaat Ministry Infrastructure & Environment)

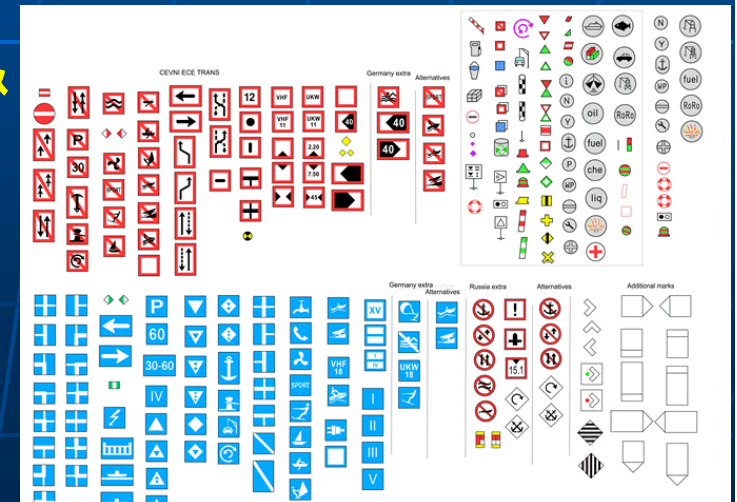

IEHG activities

- ✦ The core group of IEHG decided that the next IEHG meeting scheduled for autumn 2016 will be shifted to 2017.
- ✦ The reason is that there are not enough change requests and urgent topics available for discussion.
- ✦ Status Report on Inland ENC Development and Standardization from HSSC7 is still valid..

Development of S-401 (1)

- ✦ EU project CoRisMa Sub-Activity 4.2 (Alignment of the Inland ECDIS Standard) was finalized Dec 2015. Some results :
 - A draft product specification of the Inland ECDIS Standard (S-401), based on the draft version of S-101
 - “S-401 symbol library generator” & Inland specific symbols of the European Inland ECDIS standard

Development of S-401 (2)

- ✦ Unfortunately it came to a delay in the development of essential tools (Feature Catalogue Builder, Portrayal Catalogue Builder).
- ✦ So, we couldn't reach all aims
- ✦

Development of S-401 (3)

- ✦ In 2016 the development of S-401 has slowed down due to a lack of resources. but we are optimistic that we can make progress again due to the (new) EU RIS COMEX project.
- ✦ To be informed about the latest information on the status and the time planning of S-101 is important.
