

### **French Manual of Tides – Submitted by the IHB**

The first volume of a Manual on Tides “La Marée Océanique Côtière”, written by former IHOTC member Bernard Simon, was published by the Institut Océanographique in Paris in January 2007 under ISBN 978-2-903581-32-9.

The publication is available from the Institut Océanographique and SHOM at €50. Steve Shipman will bring a copy to the meeting for those who wish to see it.

The translation into English is currently being undertaken by a Mr David Manley in Paris and the IHB will be seeking assistance to proof read the book once translated. It is hoped to get the translation released on a chapter by chapter basis.

Volume 2 on “Oceanic Tides” is being prepared by a team of French authors. There is no information regarding completion at the moment. The IHB has agreed to fund the translation into English once the French text has been approved.
