

Taking into account IHO resolutions in INSPIRE Technical Guidelines

IHO resolution on LAT, MSL, HAT

Background

- Thanks to the participation of IHO rep. at former Inspire Technical Working Group for the themes Coordinate reference systems and grid systems, IHO resolution on LAT, MSL, HAT was included in Inspire technical guidelines
- Inspire TWG was disbanded once the technical guidelines were in place

Inclusion of new IHO resolution on LAT, MSL, HAT

- CL 27/2016 « CALL FOR APPROVAL OF A REVISION OF IHO RESOLUTION 3/1919 - DATUMS AND BENCH MARKS” was circulated among MS. Deadline for vote : 15 August
- This raises the question of updating Inspire guidelines accordingly to new IHO resolution
- At last NSHC, IHB recommended that IENWG tackle the issue

Way forward for including new resolution in Inspire guidelines

- Should be done through the **Elevation, Orthoimagery, Reference Systems and Geographical Grids Cluster**
(<https://themes.jrc.ec.europa.eu/groups/profile/206/elevation-orthoimagery-reference-systems-geographical-grids>)
- **TWCWG** or **MSDIWG** should carry the action: i.e. define a responsible among their **WG**, submit a proposition through the **Cluster**, coordinate the follow up
- **Leendert Dorst** former **IHO** rep. of the **Inspire technical WG** ready to help the action owner
- Suggest that **TWCWG** or **MSDIWG** should be the **SHOM** or **NLHO** rep.

Proposal (A5.x)

- Write to TWCWG chair for requesting TWCWG to carry the action of ensuring inclusion of IHO resolution on elevation in technical Inspire technical guidelines
- IENWG responsible for the action: Chair
- TWCWG to set up a sub-WG to handle the impact of IHO resolution 3/1919 as amended [IHO CL 27/2016] on elevation in technical Inspire technical guidelines
- TWCWG chair to report on this issue to HSSC-8 in mid-November
