How many of you are using Mobile to Pay? 

How many of you are using Google Maps? 

How many of you are using a free navigation devise e.g. Google Car Navigation? 

Danish Geodata Agency

The development in navigation on land

Free paper
card/diary

Many paper
cards and booklets

GPS-car navigation
And free digital cards

Alternative surveying
and free car navigation

Free integrated systems
and Co-driving

What will happen at next?
What shall we do as a IHO?

Crowdsourced Bathymetry Working Group (CSBWG)

IHO Statement on Crowdsourced Bathymetry

Crowdsourced bathymetry (CSB) is the collection of depth measurements from vessels, using standard navigation instruments, with support in routine maritime operations. The [International Hydrographic Association \(IHO\)](#) has the long history of encouraging the collection of crowdsourced bathymetry, in the hope of increasing our understanding of the shape and depth of the seafloor.

Topic 1: Maintenance of IHO Publication B-12

Topic 2: Developing an Outreach Strategy

Topic 3: Identify Potential Uses of CSB

Discussion topics:

- Use of Crowdsourced Bathymetry in Navigational Charts
- What is the legal status of Crowdsourced Bathymetry?
- Other potential use of Crowdsourced Bathymetry e.g. in MRB and UN-GGM
- GEBCO - The General Bathymetric Chart of the Oceans
- Crowdsourced Bathymetry and data quality - CSB Data Quality WG (DQWG)
- Establishing a new S-100 Crowdsourced Bathymetry Product Specification or AMI.
