Dear Maratos and Michel.

This is the Danish comments to the IHO S-23 WG letter. The comments should replace our comments send by mail May the 3rd.

" From a Danish point of view the publication S-23 "LIMITS OF OCEANS AND SEAS" is an important tool for naming of seas in official charts. The promulgation of S-23 should secure a harmonised approach between hydrographic offices. Therefore Denmark finds that a revision of the 1953 edition is highly needed. In order to enhance safety Denmark supports any initiative taken by IHO to advance a new revision of the IHO publication S-23 "LIMITS OF OCEANS AND SEAS". Denmark attaches importance to a solution being found which all parties involved can support."

Best regards

Jens Peter Weiss Hartmann
