

Drawn by T. Savage and C. P. Heaton

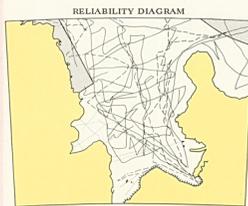

Bathymetry by A.R. Pinn, B.L. Ward, A.J. Macpherson and P.J. Barrett
Compilation by A.R. Pinn, B.L. Ward, A.J. Macpherson and P.J. Barrett. Data base organized by Geophysics Division, DSIR.

Echographic data from the USCGC *Albatross* (CG 37), USCGC *Glacier* (USCGC 1983), USCGC *Albatross* (USCGC 1983), and archival sounding from Victoria University of Wellington Maritime Laboratories (1963-81) (VUWML).

Topographic data from the U.S. Geological Survey Reconnaissance Series from Island Sheet (1973-80).

Note:
Projection: Lambert Conformal Conic, standard parallels at 70°40' S and 70°20' S.
This chart has been written on the basis of GEBCO Planning Sheet 56.
Further detail is not represented except at the 100m contour.
The 100m contour is not shown in the 100m depth contour.
This chart is not to be used for navigational purposes.
Sounding depth (PEL) data (1963-81) was supplied by Research Services Section, PSL, DSIR.
All other sounding software by C.L. Nicholson, AMRD, DSIR.
Digitizing and subsequent data manipulation by T.J. Savage, Science Mapping Unit, DSIR.
The satellite image and bathymetric contours were produced on a Macintosh platform at GECON-2, Wellington.
