Reason for Choice of Name (if a person, state how associated with the feature to be named):	Isabela is the nearest province where the ridge is located. It is the second largest province of the Philippines, and the largest on the island of Luzon in land area. The province of Isabela used to be a vast rainforest where numerous indigenous ethno-linguistic groups lived. Many of the same ethnic groups still live in the province. The name Isabela Ridge was chosen due to its proximity to the province. The feature name was prominently used in the Philippine submission of an extended continental shelf in the Philippine Rise (Benham Rise) Region.
