

Paper for Consideration by SNPWG

Papers being submitted to TSMAD considered of particular relevance for SNPWG

Submitted by:	Jeppesen
Executive Summary:	Briefing note to SNPWG regarding papers being submitted to TSMAD, and that are considered of particular relevance to the work of SNPWG.
Related Documents:	TSMAD26-xx-S-100-Roles TSMAD26-xx-S-100-Codelists-Update TSMAD26-xx-S-100-Geometries-Update
Related Projects:	S-100

Introduction / Background

The attached papers have been submitted to TSMAD26. They are considered relevant to SNPWG's work and therefore being brought to the attention of the working group.

Analysis/Discussion

The paper TSMAD26-xx-S-100-Roles is a proposal to allow flexible roles in S-100 based product specifications and if fixed roles are required these should be specified in the particular product specification.

The paper S-100-Codelists-Update, is an update to work done with regards to including code list as a permitted S-100 attribute type.

The paper S-100-Geometries-Update, is an update to work done with regards to additional geometry types that might be needed by S-100 based product specifications, such as Nautical Publications and IALA's envisioned product specifications.

Recommendations

SNPWG should review the papers and comment as appropriate.

Justification and Impacts

The papers referenced are of relevance to SNPWG as they are intended to create flexibility within S-100. This flexibility is considered necessary to a number of the items SNPWG is currently working on.

Action Required of SNPWG

The SNPWG is invited to:

- a. Note this paper.
- b. Comment on the referenced papers as necessary.
