

**Proposal for Consideration by TSMAD21
Victoria (Canada)**

29th November – 3rd December 2010

Discussion paper on the codification of BCNLAT Colour

Submitted by: Canada
Executive Summary: This is a discussion paper on the codification of BCNLAT colour and the choice of coding a full colour description and only coding the colour of lateral significance.
Related Documents: TSMAD20/DIPWG2-16.5 S-101 Consistency
Related Projects: S-101

Introduction / Background

In the past Canada has coded a full colour description for BCNLAT objects, but is moving towards the practice of only coding the colour of lateral significance.

With the goal of ENC consistency, Canada would like to know the practices and opinions of other countries in this matter/

Discussion Item

Canada would like to know what are other countries doing in this regard? Are you coding only the colour of lateral significance, or are you coding a full color definition?
