S-100 Version No.	Part No.	Section No.	Proposal Summary
1.0.0	11	Add new Appendix 11C	Add new Appendix 11C

Change Proposal

Please provide a detailed change proposal.

TSMAD25 directed the United States to propose the S-100 product specification template as a replacement to the example given in Appendix 11B. This template is designed for developers of S-100 product specifications to easily fill in the information that is needed.

TSMAD26 instructed the United States to modify the template to make it less S-101 specific. In addition, there are some new annotations for those that are doing gridded product specifications. It should also be noted that this proposal will keep the example given in Appendix 11B and add the template as Appendix 11C

COMPLETES TSMAD ACTION 1 and ACTION 19

Change Proposal Justification

Please provide a suitable explanation for the change and where applicable supporting documentation.

As more outside organizations such as IALA and WMO and internal IHO working groups are developing S-100 based product specifications a unified template should be provided to assist developers. This template will enable developers to fill in what is needed for an S-100 based product specification. In addition, this template has been reviewed by the full TSMAD and was tentatively approved at TSMAD25.

Please send completed forms and supporting documentation to the secretary TSMAD.
