

SEMANAH

Haiti's Maritime and Navigation Service

presents

**Report on the Training Session
on Hydrography and Marine Cartography**

Introduction to the Training Workshop

- Haiti participates in IPGH activities
- IHO membership request
- Prospecting visit from Hugo Gorziglia in Haiti
- Haiti participates in IHO activities in the Caribbean
- Unformal request for training in Hydrography

Agents of the technical preparation

- International Hydrographic Organisation
- Pan-American Institute of Geography and History
- SHOM, French Hydrographic Office
- Haiti's Maritime and Navigation Service

Workshop Goals

- Conduct hydrographic surveys for bathymetry
- Use the data collected to make charts
- Considered as a starting point for the SHOH

Des Transports et Communications
et de Navigation d'Haïti
MANAH
et la Cartographie Marine
septembre 2011
by Beach Hôtel,
des Arcadins.

Speech from the minister of MTPTC

The director of the MAE was an observer

12 participants + 6 auditors

Representative of the MICT

2 teachers

Haitian technicians mounting the echosounder

Yes, It's OK

The Hydro group at work

A group of people are gathered around several computer monitors in a room. The room has a light blue wall with a decorative border of dried leaves and branches at the top. A large sign with the text 'SEMANA H' is mounted on the wall above an arched doorway. The people are focused on their work, with some looking at the screens and others talking. The scene is brightly lit, likely from a window or door in the background.

Certification cerermony

2 good friends

A cartographer receiving his certificate

Conclusions and recommendations

- Urgent need of high level training
- Need survey equipments to start the SHOH
- Request IHB to kindly provide a CARIS license and an echosounder
- Strengthen SHOH capacities
- Requests 4 more signatures to become IHO member

Many thanks and grateful to:
