		Comments on Surveys:	
		Routine re-surveys are required in the Land fall-, Approaches- and port areas, which lie in sedimentation unstable river regimes. The Surinamese coastal waters are subject to frequent change because of sediment deposit from the mud banks, and a number of areas, especially the main shipping rivers require regular surveys and investigation.	

MSI	Y/N	Comments:
Local warning	YES	Notices to Mariners.
Coastal warning	Partial	Through Notices to Mariners.
Nav warning	YES	Notices to Mariners.
Port warning	Partial	On request
