		Comments on Surveys:	
		1. Outside the barrier reef the offshore reefs and deep water are unsurveyed although the risk of encountering uncharted shoal depths would appear to be low.	
		2. The approach channel to Belize City and the S part of the Inner Channel (inside the barrier reef) are surveyed to modern standards. Elsewhere the surveys are mainly 19th and early 20th century lead-line	

MSI	Y/N	Comments:
