

### Status Report on Improved Data Exchange Implementation (NORWAY)

1. National paper charts at a scale of 1:750 000 and larger that cover another nation's waters should be produced from the other nations ENC's.	Relates only to chart no 1. OK.
2. Generalization of the neighboring countries ENC data should be kept to a minimum to ensure the quality and for more efficient updating.	OK
3. Once the paper chart is based on ENC's the update should be done via ENC updates.	Implemented
4. A Paper Chart Source Information List should be kept up to date by each Nordic Hydrographic Office.	Implemented
5. NHC to decide which country would be responsible to administrate the Paper Chart Source Information Lists for all Nordic countries.	--
6. An ENC Update Query Web Service or an equivalent query function should be provided by each Nordic Hydrographic Office.	Not implemented
7. If no ENC Update Query Web Service is available then it should be possible to produce an ENC Update Report on request by another country.	In function
8. To present the recommendations and the suggested methods in this report to the IHO Chart Standardization and Paper Chart Working Group.	--
9. Implementation plan:	Implemented
a. If not already available then start to collect administrative information for the ENC Update Report 1 st Jun 2009.	
b. Each country should on request be able to produce an ENC Update Report from the 1 st Dec 2009.	Implemented
c. Paper Charts should be based on the neighbouring countries ENC's according to the following time schedule.	
i. Chart with scale larger than 1: 150 000 completed 1 st Jan 2011.	Related to chart 1 only. OK
ii. Scale 1:150 000 -1:400 000 completed fit Jan 2013.	Done for 306. Will be done when new charts are reissued.
iii. Scale 1 :400 000 - 1 :750 000 completed 1 st Jan 2015.	Not planned yet
d. Each country to present the status of implementation at every NHC-meeting.	--
