

## **A possible revision of the Nordic Hydrographic Commission statutes**

Noting that the current statutes as published on the NHC page on the IHO website last were revised and adopted at the 1992 conference;

Sweden is of the opinion that some articles and paragraphs of the current statutes need reconsideration.

We ask delegations to study the current statutes and the chair of NHC57 will open up for discussions at the conference. The conference may then consider a decision to initiate actions to revise the statutes.
