59th NHC Meeting in Reykjavik, 14th – 15th April 2015

List of Lights/Radio Beacons

Icelandic List of lights includes also list of buoys, beacons, aero lights, racons and DGPS stations. *The List of lights* is kept up to date on the web site in pdf format and has not been printed for several years.

<http://www.lhg.is/starfsemi/sjomaelingasvid/vitaskra/>

Icelandic National Tide Tables

The Icelandic National Tide Tables is published for five harbors today. It has been published for Reykjavík since 1954, from 1993 for Ísafjörður on the North West coast, Siglufjörður on the North Coast, Djúpvogur on the South East Coast and this year for the first time for Þorlákshöfn South Coast.

The tide table are also published in two Nautical almanacs published by private companies.

Tide Calendar (Tide Graphs)

This publication has been for many years and are very popular in Iceland see figure 1

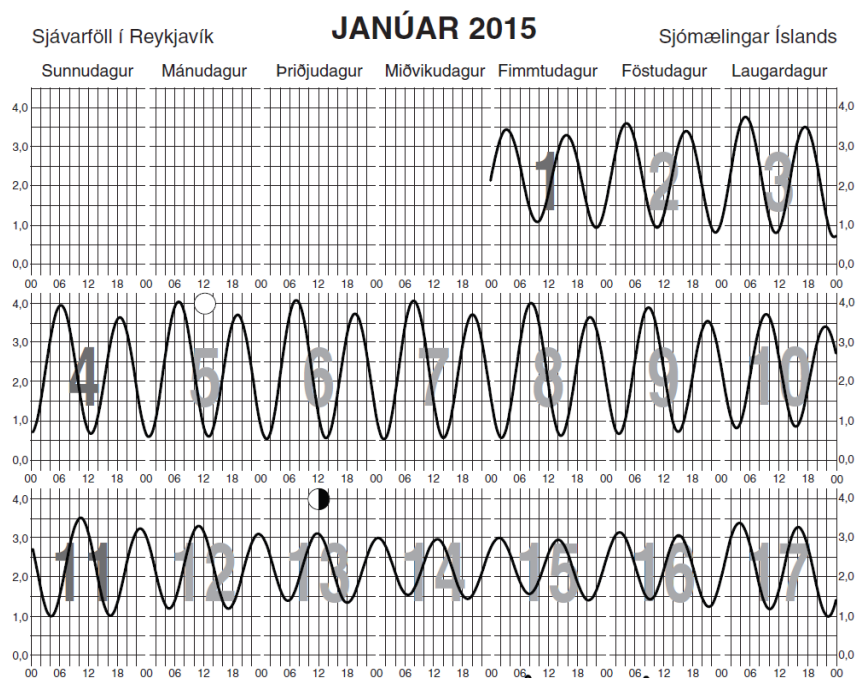

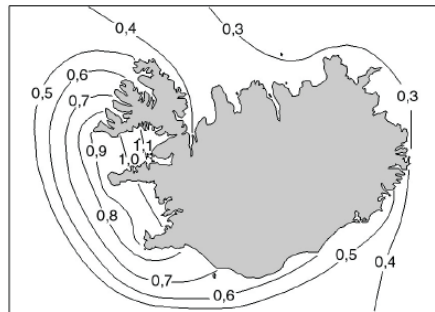

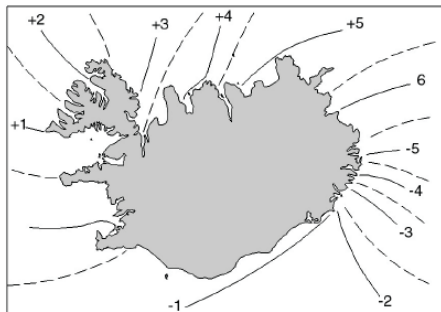

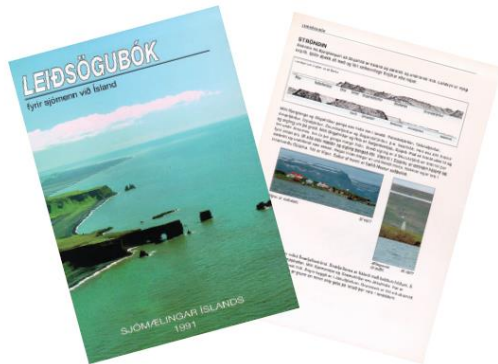

Figure 1 Tide Calendar

At the bottom of each page is a two diagrams which shows approximate difference in time and height with Reykjavik as reference station. The diagram on left gives an approximate time difference and the diagram on right approximate difference in the tidal height.

Sailing Directions (pub 1991)

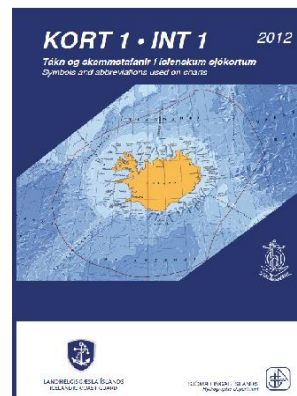

The Icelandic Sailing Directions is only available in Icelandic and was published in 1991 when the older version had been out of stock for some years. It surely needs update but due to lack of staff it has not been possible.

UKHO has in Admiralty Sailing Direction “Arctic Pilot Volume 2”. Chapter’s number 2, 3, 4, 5 and 6 are about sailing around Iceland in addition to the weather information.

The “Arctic Pilot Volume 2” has been published in close cooperation with Icelandic Coast Guard since 2009.

INT 1, Symbols, Abbreviations and Terms on Charts

Iceland moved to international chart symbols in 2001 and published The INT 1, Symbols, Abbreviations and Terms on Charts same year in both Icelandic and English. Updated version of INT 1 was published in 2012.
