

Hydrographic surveying

Survey coverage		Depth < 200m	Depth > 200m
Percentage which is adequately surveyed		0.7	2
Percentage which requires re-survey		97.7	12.5
Percentage which has never been systematically surveyed		0.4	87
Pie charts 			
Notes	1. Data now derived from survey GIS polygonal surfaces method. New values might divert significantly.		

Nautical charting within the limits of the EEZ

Coverage of charts published	Offshore passage	Landfall and Coastal passage	Approaches and Ports
Percentage covered by INT charts meeting in M-4	100	10	40
Percentage covered by RNCs meeting S-61	0	0	0
Percentage covered by ENC's meeting S-57	33	8	67
Bar charts 			
Percentage of INT charts showing depth in meters	100		
Percentage of INT charts referenced to a satellite datum	100		
Data source	France		
Notes	1. Figures provided by UK and France, courtesy of Madagascar. 2. Large scale Paper coverage: missing (non INT scheme charts) Antsiranana, Tulear, Mahajanga, Taolanaro (Fort-Dauphin) 3. Medium scale Paper coverage by US charts. 4. Small, medium and large ENC coverage ensured by GB ENC's.		

Maritime Safety Information

Navigational information	Status	Notes
Local warnings	NO	
Coastal warnings	NO	
NAVAREA warnings	YES	
Information on ports and harbours	YES	Data provided by port authorities (APMF)

GMDSS implementation	Status	Notes
Master plan	YES	
A1 area	NO	Planned.
A2 area	NO	Planned
A3 area	NO	
NAVTEX	NO	
Safety NET	NO
